THE NEW G47 MOS

GLOCK ANNOUNCES

The G47 MOS is the latest outstanding addition to the family of GLOCK pistols. Similar to the G17 Gen5 it is a 9 mm Luger GLOCK standard size pistol in MOS configuration.

THE NEW HIGH-PERFORMANCE PISTOL WITH THE LATEST GLOCK GEN5 TECHNOLOGIES

The G47 MOS with its no-compromise design, combines all the features demanded of the modern handgun of today – and of tomorrow! This standard size pistol combines a GLOCK 17 Gen5 MOS slide with a G45 frame. The slide has the proven, superior GLOCK nDLC finish. The frame with a flared magazine well completely encircles the front of the grip. Fast reloads in critical situations can be performed with speed and efficiency. Additionally, there are forward serrations precision-milled near the front, forward of the ejection port on both sides.

The G47 MOS incorporates other elements of the Gen5 GLOCK pistols including a smoother trigger pull, the enhanced frame texture for sure handling, a reversible magazine catch, ambidextrous slide stop lever, the modular beavertail backstrap system (MBS) for individual adjustability and the incredibly accurate, reliable GLOCK marksman barrel (GMB).

The G47 MOS – chambered in 9 mm Luger and equipped with a precision-machined slide constructed for your favourite optical sights. The standard size of the G17 designed with future versatility.

Optic not included
